Once installed, your terminal shell will become the talk of the town or your money back! Strangers will come up to you in cafés and ask you, "that is amazing! are you some sort of genius?"

Finally, you'll begin to get the sort of attention that you have always felt you deserved. ...or maybe you'll use the time that you're saving to start flossing more often. 😁

"The last OS X upgrade made **ZSH** the default shell. I figured it was about time to finally leave bash. After I was on ZSH, I decided to try the much famed oh-my-zsh. OMG, why hand't I tried this thing before. If you're a programmer and you're not using this, try it, now!
